Then Atomix Virtual DJ is the perfect app from which to begin! This software is perfect for those who want a lot of features and tools that can compete with those used by professionals. So what are you waiting for? Start your free trial now and don't miss out on this epic software! Atomix Virtual DJ Pro is a virtual audio mixing service that lets users produce music with no prior knowledge or experience in the field. It combines high-quality sound, available effects and powerful features that allow users to prepare mixes of unmatched quality. The program supports all versions of Windows, including Windows 10. It is also compatible with iOS devices and Android devices. The app has a unique interface that includes two turntables, the first one featuring the sound channel mixer and various buttons for selecting various options like Equalizer, Loop or Sampler effects. The second turntable allows users to load tracks directly from music files on their computers or alternatively from some external sources like YouTube videos. Although the application is quite intuitive, it also offers an extensive help guide for those who need some extra assistance in getting started with it. There is also a video tutorial that will allow users to check out the application's interface. Visitors can also ask for help from a live technician via a direct chat. The program supports all types of modern music files, including MP3, M4A, WAV and WMA. It also includes a music library manager that features some presets for easier loading of audio tracks from external sources. Users can choose to use their own music files too and this permits them to create personalized mixes with the customized settings matched to their preferences and tastes. Finally, Atomix Virtual DJ is compatible with all major DAWs such as FL Studio, Ableton Live and Pro Tools. Atomix Virtual DJ Pro Crack can make your live performances and DJ sets more exciting and entertaining. Moreover, it is very easy to use and allows you to mix songs with such effects as flanger, echo, normalize, etc. It has the function of creating audio loops that will help you to build a solid mix that will please all your listeners. Virtual DJ offers the functionalities that are necessary for professional DJs: Seamless integration: Virtual DJ operates as an external audio device and sends audio directly to other host-audio software such as iTunes, Windows Media Player or even video softwares like Adobe Premiere Pro or Sony Vegas. Most modern audio software supports Virtual DJ as an external audio device. The design: It is available in a range of colours and suit the user's preferences and work style. As we can see, Virtual DJ is very similar to professional DJ software that is used for mixing and producing music. Virtual DJ: With this application, we do not have to buy CDs anymore. We can play and preview any song we want, or any file from our computer or even from YouTube; it even supports the streaming of music from online radio stations such as LastFM or Slacker. Many people use this software as an alternative to other programs because it has more features than other music DJs out there.
